17. NOTES/DRAWING					
1. <b>PRESERVATION.</b> The individual components specified below shall be consolidated within the shipping container by placing them in their separate locations within the cushioned cutout. The cushioning material the cutout is constructed of shall conform to PPP-C-1752 and the shipping container shall conform to MS-27683.					
1.1 <b>Technical literature.</b> Unit pack each submethod IC-1. Place the technical literature on top of the contents prior to replacing the lid.					
1.2 <b>Antenna Group OE-454/ARS-6(V); OE-393/ARS-6 and OE-420/ARS-6.</b>					
1.2.1 <b>Cable assemblies.</b> Unit pack each in accordance with MIL-C-55442. Place the two unit packed cable assemblies in the appropriate location in the shipping container.					
1.2.2 <b>Antenna AS-3984/ARC; Control, Display Unit C-11755/ARS-6; Display Unit, Remote ID-2405/ARS-6; Mounting Kits MK-2683/ARS-6(V) (V1 only) and MK-2684/ARS-6(V) (V2 only); Mounting Base MT-6678/ARS-6; Receiver-Transmitter RT-1532/ARS-6; and Switching Group, Audio SA-2563/ARS-6(V).</b> As applicable, place each item in its respective location within the cushioned cutout.					
1.3 <b>Consolidation.</b> After the items comprising each set have been consolidated within the shipping container, ensure that the gasket is in place, place the lid on top of the container, then place the sealing ring around the lid and hand tighten until bottomed out.					
2. <b>Marking.</b> Each shipping container shall be marked in accordance with MIL-STD-129.					
3. <b>Changes in material/procedures.</b> No changes in materials/procedures identified in the packaging reference/prescription above are allowed unless the Federal or Military specifications have been cancelled and superseded or replaced by a Non-Government standard or Commercial Item Description (i.e.; ASTM, CID, etc.) which has been adopted/accepted by DoD.
